YUYANG (ALEF) LIU

VIDEO GAME TECHNICAL ARTIST

Michigan, US (734)489-4327 lyy20031122@gmail.com linkedin.com/in/yuyang-alef-liu/
portfolio:https://alefffffff.github.io/

Technical artist pursuing dual degrees in Computer Science and Art & Design at the University of Michigan. Experienced in shaders, real-time rendering, and performance optimization. Uses AI tools to accelerate coding and 3D modeling workflows and help teammates iterate faster.

EDUCATION

University of Michigan, Ann Arbor **2024 - May 2027 (Expected)**
Dual Degree of B.S. Computer Science & B.A. Art & Design | GPA: 3.76/4.0
Coursework: Technical Art, 3D Animation, Game Development, Data Structures, UI Development

Syracuse University | Major in B.F.A Illustration **2023 - 2024**

EXPERIENCE

Technical Artist Intern | Feiguangge Studio **May - Aug 2026**

- Project: As Lunar Whispers (七界梦谭) ↗, a fantasy MMORPG originally incubated by FunPlus.
- Shanghai Shiyi Information Technology Co., Ltd.
- Built Unity ShaderLab/HLSL effects: cloth glitter, dissolve and parallax; documented texture and shader workflows.
- Developed a Play Mode overlay that tracks draw calls and rendered triangle counts in real time and estimates rendering costs.
- Built a UE texture-atlas tool to group nearby models and bake their textures into shared atlases, automating reimport and reassignment the textures to the origen materials to decrease file sizes.

Game Development Projects **2025 - Present**

- AutoTA↗ (Oct 2026): Built a fully automated AI workflow for game art assets, translating natural-language requirements into asset search, AI generation, Blender processing and engine delivery. Supports 2D/3D asset creation, PBR materials, rigging, animation generation and model optimization, automating the complete pipeline from generation and repair to engine import.
- The Big City - Lost and Found in XR↗ (Jan 2025-Present): Blender/UE5 environments and props; Niagara effects, Blueprints and level design.
- Dreamweaver ↗ Global Game Jam (Jan 2026): 48-hour prototype; concept art, 3D Art, AI-assisted models, animation, baking and polygon reduction.
- Classroom Loop ↗ (Dec 2025): independent Unity game; gameplay scripts, models, rigs, animation and gameplay flow.

Art & Design Experience **2021 - 2024**

- Product Design Intern | Zhejiang Happy Moment Technology Co. (Jul-Aug 2024): designed merchandise proposals for The Outcast and Scissor Seven.
- Teaching/Studio Assistant | Maker Art Studio (Nov 2022-Jan 2023): installation art, graphic design and illustration.

TECHNICAL SKILLS & LANGUAGES

Languages:
English, Mandarin

Technical Skills:
Unity, Unreal Engine, Blueprints, Niagara | C++, C, C#, HLSL, JavaScript
Shaders, real-time rendering, optimization, AI-assisted coding and 3D workflows
Blender, Maya, ZBrush: modeling, texturing, rigging, animation
Photoshop, Illustrator, InDesign: illustration, character design, UI and layout
